

COMPETENCY-BASED TRAINING IN INTENSIVE CARE MEDICINE IN EUROPE

Become a CoBa collaborator!

Get involved

- ◆ Join one of our working groups
- ◆ Make your own contributions
- ◆ Develop the e-portfolio

The screenshot shows the CoBaTrICE website interface. On the left is a navigation menu with categories like '1. Resuscitation', '2. Diagnosis', '3. Disease Management', '4. Interventions', '5. Procedures', '6. Perioperative Care', '7. Comfort & Recovery', '8. End Of Life Care', '9. Paediatric Care', '10. Transport', '11. Safety & Management', '12. Professionalism', 'Basic Sciences', 'Resource Portals', and 'ICM Societies'. The main content area is titled 'PERI-OPERATIVE CARE' and shows search results for '37 result(s) found'. Two results are visible: 'ACC/AHA Guideline Update on Perioperative Cardiovascular evaluation of non-cardiac surgery' and 'ACC/AHH 2004 guideline update for coronary artery bypass graft surgery'. On the right, there is a 'COMPETENCIES' section with an 'Introduction to Competencies' and a 'Level of expertise and supervision' diagram. The diagram shows three levels: 'Dependent practice', 'Limited (supervised) practice', and 'Independent practice', with arrows indicating the progression from dependent to limited to independent practice.

Trainees

- ◆ Review your competencies in ICM
- ◆ Start an international CoBaTrainees group

Trainers

- ◆ Assess competencies
- ◆ Explore the syllabus
- ◆ Access educational resources

Training Programme chairs

- ◆ Consider using CoBaTrICE to support your national programme

Researchers

- ◆ Help us develop our educational research programme
