

ESICM YOUNG INVESTIGATOR AWARD WINNERS

2010

Dr Zudin PUTHUCHEARY (United Kingdom)
Acute Muscle Loss in Critically Ill Patients: An Observational Study

2009

Dr Michael PIAGNERELLI (Belgium)
The Ci-Sel-P study: Relationship between respective decrease in plasma selenoprotein-P concentration and micro and macro-circulation disorders using an ovine model of septic shock caused by a peritonitis

2008

Dr Pierre TISSIERES (Switzerland)
Defects in opsonophagocytosis in premature infants as a factor for the development of neonatal sepsis.

2007

Dr Frederic PENE (France)
Consequences of sepsis-induced immunosuppression: Mechanisms of Pseudomonas aeruginosa pulmonary infection

2006

Dr Giacomo BELLANI (Italy)
Imaging of lung inflammation and recruitment during ALI/ARDS

2004

Dr Martin STOTZ (Switzerland)
Evaluation of prolonged systemic inflammation induced by sepsis

2003

Dr Hendrik BRACHT (Germany)
Effect of type of experimental model and volume management on blood flow regulation, vascular reactivity, oxygen transport and utility, gut motility, and organ function in sepsis

2002

Dr Emmanuel ROBIN (Belgium)

Relationship between oxidative stress and apoptosis in myocardial ischaemia-reperfusion

2001

Dr Hauser BALAZS (Hungary)

Interaction of the activation of the inducible nitric oxide synthase with both the hemoxygenase-1 related endogenous release of carbon monoxide and the formation of free oxygen radical species during long-term hyperdynamic porcine endotoxemia

2000

Dr Gilles LEBUFFE (France)

Effects of Cyclic Strain on Reactive Oxygen Species signalling in lung cells: Inflammation mediated by mitochondrial signalling
