## EDUCATION AND TRAINING IN MAY 2012: PRELIMINARY PROGRAMME

### Advanced Training Courses in Intensive Care Medicine

The following preliminary programme is subject to modification after printing.

#### COURSE DESCRIPTION:

The Management Skills in Intensive Care Course is aimed at specialists and trainees in intensive care medicine. The aim of the course is to enable candidates to develop knowledge and skills with the organisational and management aspects of running an intensive care unit. These are important skills required for specialists interested in career progression. The course uses a mixture of blended learning techniques including problem based learning, small group teaching, workshops, video, didactic lectures and includes a comprehensive course workbook. Topics covered during the course will include: General management of an intensive care unit, Current global economic impact on intensive care, Quality and performance indicators, Leadership, Patient safety, Risk management, Managing conflict, Effective negotiation, Writing a business case, Teamwork, Achieving change, Work life-balance, Managing difficult trainees, Finance, ICU budgeting and resource management. The 2-day course is run by an experienced faculty of intensivists with a specific interest in intensive care management who bring a wealth of knowledge and experience to the course.
