

FACULTY LIST

ESICM Declaration of potential conflict of interests

The Society wishes to ensure that all those who participate in the Society's professional, administrative, scientific and educational activities, including speakers and chairpersons at the Annual Congress, have the opportunity to declare any interests they may have which could influence, or might be perceived to influence, their judgement or behaviour.

Competing interests may arise from academic, financial, or professional activities and ambitions. These are inevitable, and in many instances do not adversely affect behaviour. Similarly, research and educational relationships with industry are desirable and essential for progress in health care. However, these tensions and relationships provide opportunities for abuse and inappropriate influence.
