Lui G Forni
Section Chair

Michael Joannidis
Section Deputy
Present: Prof LG Forni (Chair) & Prof M Joannidis (Deputy)

H Oudemans, P Honore, H Stapen, G Landoni, W Druml, A Schneider, M Van Dam, A DePont, O Joannes-Boyau, C Ichai, M Legrand, M Schetz, T Bobak, S Vaara, C Thompson, M Omerbegovic

Apologies: M Ostermann, J Prowle, E Hoste.

1) Progress regarding ESICM Lives 2016 was outlined. In particular the idea was raised concerning more joint sessions particularly with MENN: C Ichai did propose a joint session regarding citrate. This will be

2) PG Course. This was extremely well received (attached) with 15 out of 17 replies rating the course as good or excellent and would recommend it to colleagues.

3) Suggestions: Ideas for Lives 2016 were put to the floor. This caused some debate over the need for new information coupled with the need to supply CPD. Members present will send suggestions to Lui Forni or Michael Joannidis.

4) Guidelines Update: This has been discussed with ICM. The plan is for a further meeting during Lives 2015 with a plan to submit the final article by end of 2015.

5) Update was given regarding the now published AKI-EPI and PEACE which is now closed to further sites. Some individuals did report some problems with the website which is being addressed. Any further studies like this will use the ESICM platform in future.

6) MARTINI was proposed (in the absence of Dr Ostermann) although not uniformly well received this will together with a maximum of 2 other projects be forwarded to the Trials group for consideration. Dr Legrand suggested a study with the use of a care bundle for treatment of AKI. It was suggested that he work up a proposal and this could then be discussed.

Prof Forni thanked the attendees for coming to the meeting which was the best attended over the last 4 years which shows how the AKI section is growing.
