

The Intensive Connection

LIVES 2019 - BERLIN

ARF section Meeting

When: Monday, September 30th from 07:30 to 8:30

Where: Room M1 (Level 3) at the CityCube in Berlin.

Chaired by Jordi Mancebo (JM) and Luigi Camporota (LC)

1. JM welcomed all the members and gave an update on the activities of the ARF section in Berlin – LIVES 2019
2. JM invited to email proposals for LIVES 2020 in Madrid - particularly invited complete proposals with titles, speakers and chairs. Point raised about how the slots are finally assigned and decided. There was discussion about that there need to be a balance in the gender, age, ethnicity, Countries in the faculty.
3. JM gave an update on a successful Ventilation Masterclass at the LIVES 2019 in Berlin – thanks all the faculty and feedback forms will be sent and will inform next year PG course.
4. Update other ARF section courses: June 2019 -SOA course on MV- Nov 2019 -Monitoring
5. Updated on the INSPIRES meeting. The meeting is ESICM sponsored and details can be found on the ESICM website.
6. PLUG activities. Laurent Brochard gave an update on the activity of the PLUG working group. There are a number of ongoing studies: SIGH study, RECRUIT study on the use of EIT in mechanical ventilation.
7. Educational activities. Hadrien Roze – gave an update on the ESICM ARF e-learning programme on the ESICM Academy website. This includes microunits with tutorials, scenarios, videos and short chapters. These modules include presentations, animations, voice recordings etc. All the details and instructions on how to do the recordings will be available on the ESICM website. If any
8. Update WEAN SAFE. John Laffey presented the goals and update on the WEAN-SAFE study. Presentation on the WEAN-SAFE. 476 centres in the current analysis. 46% from Europe, but good representation from each continent. Data will be presented during the LIVES 2019 in Berlin.
9. John Laffey presented the activities of the Translational Biology Group. The aim of the group is to bring together pre-clinical researchers, to strengthen collaborations and become a forum for collaborative grant applications. TBG will meet and have sessions in INSPIRES in Dresden.
10. Update regarding ESICM sponsored surveys. Luigi Camporota presented – on behalf of the Survey BU - the new Survey format and regulations that will be launched after the LIVES in Berlin and will be available on the ESICM website.
11. Chiara Robba presented a Consensus Conference MV in brain injury. The aim of the consensus is to identify practices and identify gaps. The consensus is in collaboration the Neuro-Intensive Care society and with NIC and ARF section within the ESICM. The consensus guidelines will cover the entire spectrum of ventilation in the brain-injured patients. The systematic review stage is complete and the timeline will be to submit by June 2020. CR also presented a VENTIBRAIN observational study on the ventilation settings in brain injured patients. Expressions of interests are open.
