

## Metabolism-Endocrinology-Nutrition MEN section

### Zoom-Meeting March 5, 2021 16:30-17:45 - Minutes

*Thank you, Kenneth, for creating the Zoom room ☺*

Chair: Mette Berger (MB), Gunnar Elke

Participants: K. Christopher (KC), C. Ichai (CI), A. Reintam-Blaser (ARB), O.Appelberg (OA), M. Casaer, J. Gunst, O. Rooyackers, J. Starkopf, J. Wernerman, E. De Waele, M. Hiesmayr, A. Hill, JC Preiser, M. Laube, A.r Wilmer, A. de Man, AF Rousseau, J. Jonckheer, K. Gundogan, Z. Puthuchery, S. Jakob (and a few others at part time ☺)

Excused: K. Amrein, M.Al-Haddad, G. Besch. S. Fruhwald, P. Singer,

#### Update iSOFA/Mesenteric ischemia survey

**iSOFA** : ARB reports “awkward” editorial feedback on revised submission to Crit Care, decision still pending, if rejected then resubmission to other Crit Care journal or Clin Nutr along with EN subpaper

**Mesenteric ischemia:** Endorsed by ESICM (invitation in April) and several surgical societies. 200 answers to-date. ARB will send out link to survey once more, as was distributed by ESPEN (and by EDW via twitter), KC will distribute through to his réseau.

link to mes. ischaemia e-survey: <https://www.tfaforms.com/4865416>

#### Upcoming projects

**Dysphosphatemia project.** C.Ichai gives update: it is planned as a prospective observational study focusing on prevalence, risk factors and treatment modalities. With actual design, 50-70 variables would be recorded per patient and day in an e-CRF (OA). To facilitate ethical approval, only centers doing daily electrolyte determinations should participate: OA will give us numbers from the survey. Considering the numbers of variables to record, centers with research structure and PDMS extraction facilities are encouraged to participate. Ethics: every country will need to get their own national approval. KB provides examples of sample size estimation depending taking the outcome example mortality (if difference is 12% / 20%, n=464 per group, if mortality is 12% v 25%, reduction to a total around=400). Next step: “Subcommittee” to further discuss project in more detail and take next steps (CI, MB, KBC, JW volunteered), Email to CI/MB for subcommittee participation.

**Parallel retrospective hypophosphatemia big data study** is coordinated by P.Singer

**Have declared their interest for the dysphosphate study so far:** A. De Man, K. Christopher

**Core Outcome set for nutritional trials:** ZP presents “COS” a Delphi survey project to be ready for launch April 21th. (attached pdf link). Very important to finally get patient opinion! ZP has sent out email for those MEN section members willing to participate in further planning steps and is keeping whole MEN section up-to-date. MEN section will participate in the survey.

**Link:** <https://www.dropbox.com/s/zo2gqvy12v5h0xf/delphi%20proposal.pptx?dl=0>

**Upcoming LIVES2021:** MB reports it is still uncertain whether congress will be “hybrid presential”, or purely digital Final decision end April). Presentation proposals are ready and submitted (with Mix-up instead of sole MEN sessions attracting larger audience)

#### Varia:

**NutritionDay-ICU:** M.Hiesmayr reminds that participation is still possible until end of May

**Some mails** of MEN section members bounce back – please for those who know our colleagues correct emails: Ingmar Lautenschläger: [ingmar.lautenschlaeger@uksh.de](mailto:ingmar.lautenschlaeger@uksh.de) // Julius Grunow: [julius.grunow@charite.de](mailto:julius.grunow@charite.de)

**NEXT MEN section meeting - Friday June 4, 4pm, hopefully functioning Zoom room!!**
