

Adrian VK Wong, MD

Specialty: Intensive Care Medicine, Anaesthesia
Institute: Oxford University Hospitals
Department: Adult Intensive Care Unit
City: Oxford
Country: United Kingdom
Function: Consultant Intensivists and Anaesthetists
Scientific Focus: point-of-care ultrasound, quality measures, safety, education

Key words: point-of-care ultrasound, quality measures, safety, education

What else do I want to say?

I am relatively early in my consultant career but like so many others, have been inspired by role models who took the time to guide, inspire and mentor me during my training in internal medicine, anaesthesia and intensive care. As a high-pressure specialty, I think we should look after each other a bit better – burnout within our specialty is a concern. Mentoring is a part of this. My clinical interests are in point-of-care ultrasound, training/education of the next generation of the Intensivists and safety within the ICU. I am fascinated by the role of technology including social media in 21st century medical education. I am an EDIC examiner and sit on the Clinical Training Committee of the ESICM. In my free time, I travel the world for food and collect/build Lego.

From a mentor perspective, I consider myself a grounded individual who understands the challenges of training and working in ICM. I obviously have particular expertise and shared interests would be a bonus but not essential as I think the mentor-mentee relationship should be mutually beneficial.
