

Bernd Saugel, MD, Associate Professor

Specialty: Anesthesiology, Intensive Care Medicine, Internal Medicine
Institute: University Medical Center Hamburg-Eppendorf
Department: Center of Anesthesiology and Intensive Care Medicine
City: Hamburg
Country: Germany
Function: Consultant
Scientific Focus: Cardiovascular dynamics, perioperative hemodynamic management

Key words: Cardiovascular dynamics, hemodynamic management, cardiac output

What else do I want to say?

As a mentor I would like to provide insights into my own clinical and scientific career in anesthesiology, intensive care medicine, and internal medicine. Combining clinical work and research is of central importance in my daily work. My research group focuses on concepts of "personalized hemodynamic management" using advanced innovative hemodynamic monitoring methods in anesthesiology and intensive care medicine. I was fortunate to have been inspired by several enthusiastic teachers in different countries in Europe and the USA who took the time to guide and mentor me during my clinical and scientific training. It is a pleasure and honor to be allowed to share my personal and professional knowledge and experiences with enthusiastic young colleagues building their clinical and academic careers. Time for listening, asking questions, and discussing your professional clinical, scientific, and academic development will be the most precious thing I have to offer.
