

## Claudio Ronco, MD

**Specialty:** Nephrology, Paediatric Nephrology  
**Institute:** San Bortolo Hospital  
**Department:** Department of Nephrology and Transplantation at the International Renal Research Institute (IRRIV)  
**City:** Vicenza  
**Country:** Italy  
**Function:** Director  
**Scientific focus:** Acute Kidney Injury, Cardiorenal Syndrome, Critical Care Nephrology, Dialysis technology, Extracorporeal organ support in critically ill patients,  
**Key words:** AKI, Biomarkers, Critical Care Nephrology, RRT

### What else do I want to say?

I am currently Director of the Department of Nephrology and Transplantation at the International Renal Research Institute (IRRIV), San Bortolo Hospital, Vicenza, Italy.

I am considered the pioneer in many areas of nephrology including critical care nephrology, CRRT, cardiorenal syndromes and wearable dialysis technology.

I also held positions as an Assistant and Associate Professor at the Division of Nephrology in Vicenza, and Director of the Renal Laboratory of research at the Renal Research Institute and Professor of Medicine at the Albert Einstein College of Medicine and Beth Israel Medical Centre of New York in 1999 and 2000.

My Mission of Life and of my institute (International Renal Research Institute of Vicenza) is contributing to renal diseases knowledge and their treatment advance, through a research which continually sees researchers coming from all around the World working in symbiosis, under a team spirit. More than anything, the IRRIV is the realization of my dream that came true when the Institute, from being a virtual entity, existing in researchers' scientific works only, came to be a real and concrete area, equipped with laboratories, more than with study and multimedia halls.

For this reasons, it would be a pleasure for me to mentor young physicians in dealing with research projects addressing acute kidney injury and extracorporeal therapies.

Join the program, and be part of my team!
