

Gennaro De Pascale, MD

Specialty: Anaesthesiology, Intensive Care Medicine, Infectious Diseases
Institute: Fondazione Policlinico Universitario A. Gemelli IRCCS – Università Cattolica del Sacro Cuore
City: Rome
Country: Italy
Function: ICU attending Physician
Scientific focus: Risk factors, management and outcome of sepsis and septic shock. Difficult to treat infections. Multidrug Resistance. Biomarkers of infection. Microbiome. Blood purification techniques. Ventilatory support.
Key words: Severe infections; Sepsis and Septic Shock; Antimicrobial Stewardship

What else do I want to say?

My academic interest in the fields of sepsis and severe infections has been starting since many years, during my first specialty training as infectious diseases consultant. The possibility to merge such background with the experience gained during the Anaesthesiology and Intensive Care residency program gave me the possibility to take part to many national and international projects regarding the prevention, diagnosis and treatment of severe infections in ICU. During last years my competencies in this field have been focusing on the clinical application of new microbiological diagnostic and pharmacology monitoring.

It would be a pleasure for me to mentor young physicians in dealing with research projects addressing such topics

Sincerely

Gennaro De Pascale
