

Iwan C.C. van der Horst, Associate Professor

Specialty: Intensive Care Medicine, Cardiology
Institute: University Medical Center Groningen
Department: Critical Care
City: Groningen
Country: The Netherlands
Function: Attending intensivist, deputy course director, principal investigator, lecturer Bachelor of Medicine
Scientific focus: Unraveling heterogeneity among critically ill patients with multimorbidity to identify underlying causal mechanisms, to improve prognostication and target treatment

Key words: Physical examination, critical care ultrasonography, systematic reviews, big data, decision making

What else do I want to say?

Over the past years I enjoyed working with young colleagues, researchers, professionals to improve the care for critically ill patients. Combining patient care with research and teaching every single day is for me the source for innovations.

At our Department we have a strong vision for sharing knowledge. Furthermore, we are lucky to have intensivist from various specialties with their specific skills. In our country intensivists origin from Anaesthesiology, Internal Medicine, Pulmonology, Surgery, Neurology, Cardiology etc.

I also enjoy living in Groningen. Our city is green and stimulates healthy living.

If you are a team player, hard worker, decision maker and able to integrate research and education in daily practice, you might be our next fellow.
