What else do I want to say?

I am very keen to support the ICE Mentoring programme. During my training and professional life, I have benefited from the help and guidance of mentors and highly appreciate the value of good mentoring.

I commit to being an active and supportive mentor and look forward to sharing new ideas and insights with colleagues. I am prepared to make time to listen, ask challenging questions, and provide constructive feedback, as well as giving insight into my own career path. An interest in my particular clinical or research area is not essential. My aim is to assist and support younger colleagues in obtaining their career goals.

I believe that successful mentoring can help both, mentor and mentee in their professional development and I look forward to this opportunity.
