## EuroAsia 2020 Report

Hybrid physical and online conference

Fourth annual EuroAsia conference

EuroAsia 2020 took place on 12-13 September 2020 in Taipei as a hybrid physical and online conference during a COVID-19 pandemic era.

Almost 3,300 online participants from 88 countries and 1,300 on-site participants attended the two-day conference. The extensive scientific programme – developed between ESICM, TSCCM (Taiwan Society of Critical Care Medicine), TSECCM (Taiwan Society of Emergency and Critical Care Medicine), and Asian Society partners - comprised a broad range of key lectures and interactive courses, covering topics as diverse as database and data science, sepsis management, COVID-19, extracorporeal life support, hemodynamic monitoring, quality management, immune dysfunction, nutrition, and patient safety.

90 abstracts were presented, all stimulating ideas and data from both European and Asian perspectives. 31 were hybrid online and on-site oral presentations, 59 were video presentations broadcast from the official website of EuroAsia 2020. With the support and sponsorship of our industry partners, the conference featured demonstrations of many of the latest products and advanced services available to intensive care professionals.

ESICM, TSCCM, and TSECCM would like to take this opportunity to thank all the delegates, faculty, national societies throughout Asia, and our industry partners for playing an essential part in putting together this unforgettable, world class event. Together we made EuroAsia 2020 a wonderful memory.

In the fervent hope that the COVID-19 pandemic ends soon, we wish you all the very best.
