

The Intensive Connection

TransBio Section LIVES 2022 Meeting

Date: Monday, 24 October 2022, from 17:00 to 18:00pm CET

Location: Room 341, Level 3 of the Palais des Congrès.

- | Agenda items | Speaker |
|--|-----------------------------|
| <p>1. Welcome</p> <p>The Section chair welcomed everyone to the meeting. He congratulated Dr Gaetano Perchiuzzi on his election as Chair elect of the TransBio section. Gaetano will be taking over as Section chair at LIVES 2023.</p> | J. Laffey |
| <p>2. LIVES Conference Update</p> <p>LIVES 2022 has been very successful in regard to attendance with over 5,5000 pre-registered for the conference. The conference this year has fewer traditional sessions, with a greater focus on workshops and interactive debates/discussions.</p> <p>TransBio section has the following sessions and roundtables at LIVES.</p> <p>Thematic sessions: Reducing Heterogeneity in ARDS – Sub phenotyping or a new Definition
Emerging therapies – what will we be using in 2030</p> <p>ROUNDTABLES: Why have we no specific therapies for Sepsis?
Why have we no specific therapies for ARDS?</p> <p>INTERVIEW: TransBio Paper of the Year</p> | J. Laffey |
| <p>3. Update on NEXT Activities</p> <p>a. Travelling Fellowships: A proposal for TransBio travelling Fellowships is being developed for submission to the ESICM leadership.</p> <p>b. Mentorship Program: This is a key priority of the NEXT committee. John Laffey has agreed to mentor an early career clinician scientist. Our section is keen to be involved to provide mentorship to translational researchers that are NEXT members.</p> <p>Request: Can TransBio section members who are interested in participating forward your names to John Laffey or Gaetano Perchiuzzi?</p> | M Pellegrini/ D. Battaglini |
| <p>4. Social Media and Digital Content Committee Update</p> <p>Podcasts: The section has had a very successful recent podcast on the ‘Role of pre-clinical experimentation in intensive care, from ethical to clinical practice’ to be given by Dr Marcin Osuchowski.</p> <p>Webpage: The committee is planning to revamp all of the webpages on the ESICM website. We will be approached in due course for content in relation to this. Ideas on what should be included on our site would be appreciated.</p> | G. Perchiuzzi |
| <p>5. Clinical Training Committee Update</p> <p>This committee continues to meet regularly, and quite a clinical training focused committee, with little emphasis so far on the research training aspect. It is important that we continue to be represented here so we can push the research training agenda.</p> | B. McNicholas |
| <p>6. E-Learning Committee Update</p> <p>See elearning initiative below.</p> | M. Osuchowski |

The Intensive Connection

7. **Research Committee Update** G. Albacea
• This was deferred as Guillermo was unable to attend.
8. **eLearning initiative on Translational Research** M. Osuchowski
Marcin Osuchowski presented a proposal for an eLearning initiative on Pre-clinical Research in Intensive Care Medicine (see attached proposal). This will take the format of a series of multi-media chapters on key aspects of preclinical research to be compiled by TransBio section members, and will be hosted within the Academy section of the ESICM website.
Request: Please consider volunteering to lead on one of the 6 chapters in the outline developed by Marcin, and contact either John L or Marcin O to nominate yourself.
9. Call for TransBio Exec Committee Members J. Laffey
We need to replace Gaetano Perchiazzi and Bairbre McNicholas in their roles as committee members for the Social Media and Digital Content Committee and Clinical Training Committee, as they have been elected to other roles in the society.
Request: Please consider volunteering to represent the TransBio section on one of these 2 committees, and contact John L to nominate yourself or suggests a colleague for these roles.
10. Update on **membership category for non-clinical researchers** J. Laffey
We think there is a significant opportunity with the TransBio section to attract Scientists to join ESICM, and would offer advantages to ESICM by broadening its appeal and enhancing diversity of membership etc. We suggest that this membership could be structured in a similar way to the current N&AHP, but with a dedicated category of 'Scientist'. Scientists can currently join, but need to join in the 'Nursing and AHP' category. The section is in ongoing discussions with the ESICM leadership in regard to this, and will keep the Section members updated on progress.
11. **Intensive Care Medicine Experimental** Update N Juffermans
Great news – Intensive Care Medicine Experimental will receive an Impact Factor from Clarivate Analytics from January 2023! Please send your best translational research papers to ICM Experimental.
12. **INSPIRES Meeting** Madrid Nov 16 - 18 J. Laffey/N Juffermans
The fifth INSPIRES conference is taking place in Madrid from Nov 16-18th. The conference is endorsed by the TransBio section and is an important opportunity for translational researchers in critical care to meet and network.
13. **Section initiatives for 2023** ALL
a. **ESICM Translational Biology Conference** – discussions with the ESICM leadership are continuing in regard to the feasibility of a translational biology conference. The idea is well received, but there are significant work to be done to determine how it would be done in a sustainable manner.
b. **Section meetings** – following discussion, the intent is to continue with regular virtual Section meetings and an annual in person meeting during the LIVES conferences annually.

John Laffey
TransBio Section Chair
