Danish Society of Anaesthesia and	Chair of the Research	2010-	2013-

## Comments

### Details on your candidature

I'm a clinical and academic intensivist doing 50% clinical work and 50% clinical research in the general ICU at Rigshospitalet in Copenhagen.

I led the landmark trials, 6S, TRISS, CLASSIC and COVID STEROID and the Danish national Centre for Research in Intensive Care from 2015 to 2021 when the centre change to the collaborative network Collaboration for Research in Intensive Care ([www.cric.nu](http://www.cric.nu)), which constitutes clinical researchers, methodologists and 30+ European ICUs planning, designing and conducting clinical trial programs together within an inclusive, fair and transparent framework.

The trials and the research programs around them have been done in extensive international collaboration mainly focused in Scandinavia and Europe but also in India, Brazil and Australia.

The trials and research centre were funded by Danish government grants and philanthropic grants from the Novo Nordisk Foundation.

My research continues along this track testing frequent interventions given to critically ill patient for which there are doubts about the balance between benefit and harm. The ongoing clinical research programs include the use IV fluids, anti-arrhythmics, and antibiotics in ICU patients. Along this line, I lead a national program to form one common platform trial for all Danish ICUs ([www.incept.dk](http://www.incept.dk)). My present part-time position in Paris has the goal of designing and conducting the large trial within the PLOT-ICU program on platelet transfusion in ICU patients together with professors Azoulay and Pène and the NINEi network

#### Ambition

If elected, my ambition will be that ESICM facilitates funding, infrastructure and support for European-based international randomized trial programs in collaboration with established research groups and networks and that senior and young investigators become engaged in the work. The conduct of surveys and cohort studies should be refined to inform trial designs.

#### Expectations

If elected, my expectation will be that the Executive Committee and Council ensures the framework and resources for the above ambitions to be fulfilled within a few years.

## Financial interests

### Description

I hold research grants from the Novo Nordisk Foundation and Sygeforsikringen 'danmark' and have received support from Pfizer in 2020.

My institution has received support for research from Fresenius Kabi and done contract research for AM-Pharma and Ferring.
