Details on your candidature

I feel that it is very important for a candidate to have acquired some experience before plunging into such a task and asking for such a position. I have been an elected member of the executive committee of the Hellenic ICU Society for the last 12 consecutive years, holding 2 terms as treasurer, one term as Vice-President, and presently as President. At the same time I have been with the ESICM Executive Committee for the last 9 years, initially as country rep, then as a nominated member of EBICM working towards achieving free movement of intensivists across Europe, as well as establishing a standard curriculum for Intensive Care and finally as a nominated member of the ESICM Diversity and Inclusiveness Monitoring Group. In addition, during this time I have collaborated with the ESICM leadership, with all three past presidents, in organising the Athens Hemodynamic Lives Forum in 2017 and the TRAUMA LIVES in 2022. Furthermore, I was directly involved in hosting mentorship programs in Greece. If elected I would support all decisions that promote research, education and

advancement of the Society especially to young intensivists because I truly believe that they are the future of the Society not only for ESICM but are the future of every ICU Society. I will support all endeavours to achieve professional recognition across Europe for all our members, to improve our network and to bring more members in. Lastly, a few words about my professional experience. I hold a degree in Biology (Concordia University Montreal Canada), a degree in Medicine (NYU, USA), a post grad degree in Institutional Administration (Concordia, MTL, Canada) and a PhD in Medicine (National and Kapodistrian Univ. Athens, Greece). I am a Surgeon and an ICU Specialist and have worked in University clinics throughout my career. Presently, I am a Senior Consultant Intensivist working in a 70 bed General ICU at the 1st University Critical Care Department of Evaggelismos Hospital in Athens Greece, the largest ICU Department in the Country. My ICU is a teaching department for medical and postgraduate students, is a trainee centre for young intensivists, is a referral centre for specific cases and has been a COVID centre since the beginning of the pandemic. My duties include both clinical and academic work. I furthermore teach at the post graduate level (MSc in Intensive Care) at the National and Kapodistrian University of Athens and at the University of West Attica (MSc in Trauma). I have the European Certification on Clinical Nutrition and Metabolism, I am an ERS certified trainer for BLS and ALS and a certified trainer for ATLS. I was involved in the ESICM space 19 campaign and training for COVID. My field of interest include nutrition and metabolism (member of the MEN Section), sepsis (involved in the authorship and revision of the sepsis module of ESICM) and trauma and have authored and co-authored numerous scientific publications.
