

Act fast! Act right! How can we optimize the management of critically ill patients with MDR Gram-negative infections?

Tuesday 24th October 2023 | 15.30-16:30

Piazzale Carlo Magno | Space 2, Level 0

Dear Colleagues,

It is our pleasure to invite you to attend the Menarini symposium ‘Act fast! Act right! How can we optimize the management of critically ill patients with MDR Gram-negative infections?’ during the ESICM 2023 congress.

During this one-hour session, presentations and discussions will examine the key issues and challenges relating to the management and treatment of patients in the intensive care unit with multi-drug resistant Gram-negative infections.

We look forward to meeting you at the symposium.

Professor Jan De Waele (BE)

Surgery-trained intensivist at Ghent University Hospital, full professor at Ghent University, Senior Clinical Investigator at Flanders Research Foundation. Specializes in antibiotic therapy optimization for severely ill patients.

Dr Gennaro De Pascale (IT)

ICU Physician – Associate Professor of Anaesthesiology and Intensive Care. Main academic interest is focused on sepsis, severe infections and difficult to treat bacteria.

Dr Paula Ramirez Galleymore (ES)

Doctor of medicine from the University of Barcelona, specialising in critical care medicine supported by her role as a medical consultant in the Hospital Universitario y Politécnico la Fe's intensive care medicine service. Research activity in the field of infection and sepsis with more than 100 original publications in national and international indexed journals.

Agenda

15.30 Welcome & Introduction

Professor Jan De Waele (BE)

15.35 Timing is everything! What can inform early decision making?

Dr. Gennaro De Pascale (IT)

15.55 Exploring the challenges and solutions when treating multi-drug resistant Gram-negative infections in the intensive care unit

Dr. Paula Ramirez Galleymore (ES)

16.15 Panel discussion and Q&A

Professor Jan De Waele (BE)
