Details on your candidature

I am an intensivist–internist working as an attending physician in the 1st ICU of the General Hospital of Thessaloniki “G. Papanikolaou” in Thessaloniki, Greece. I hold an MSc in Medical Research Methodology and was awarded the title of Intensivist in July 2024. ESICM and the NEXT community have already invested in my development through pathways and fellowships. I would value the opportunity to give back to the Society by

supporting other young intensivists, as I have already been supported by ESICM and NEXT.

My education and professional experience are relevant to the mission of NEXT, which is to promote participation among young ICU professionals, encourage integration within ESICM, and support members' involvement in Society activities. In addition to my Internal Medicine and Intensive Care training, my MSc provided a strong foundation in study design and statistics (SPSS, STATA). Through ESICM initiatives, I completed the Acute Kidney Injury Pathway, the Hemodynamic Monitoring Pathway, and the Antimicrobial Stewardship for Severe Infections Pathway, all of which included fellowships in Europe. These experiences helped me translate evidence into practice and collaborate within international, multidisciplinary teams.

Teaching and knowledge sharing are areas I particularly value. I have served as faculty member in antimicrobial stewardship courses (Greek Drive-AMS), taught Internal Medicine at the vocational school of Papanikolaou Hospital, and participated in educational workshops of the Hellenic Society of Intensive Care Medicine. As an active member of the latter, I have been invited as a speaker at national congresses and contributed to scientific publications and ESICM LIVES abstracts.

If elected, my goals include supporting educational activities, facilitating collaboration and mentorship among young intensivists, and promoting the integration of NEXT members into ESICM's scientific and educational structures. I am particularly interested in initiatives related to acute kidney injury and antimicrobial stewardship, but I am equally committed to contributing wherever the Committee identifies needs and opportunities. In summary, I hope to contribute with my clinical expertise, teaching experience, and research engagement to the goals of the NEXT Committee. Above all, this candidacy reflects my wish to give back to ESICM by sharing the opportunities and guidance I have received, and by helping other young colleagues integrate, learn, and contribute within our Society.

Financial interests

Description

I have no financial interests to declare.
