Details on your candidature

Besides my Hungarian specialist certification in Anaesthesiology and Intensive Care, I hold the European Diploma in Anaesthesiology and Intensive Care and European Diploma in

Intensive Care (EDIC, 2025). Since 2021 I have been a senior lecturer at Semmelweis University, and in 2022 I became a consultant in cardiovascular anaesthesia, intensive care, and mechanical circulatory devices at the Heart and Vascular Centre at Semmelweis University. Since 2023 I am the unit lead for postgraduate education I help trainees to broaden their knowledge in our field.

My professional development has been enriched by several fellowships: a 2020-2021 fellowship in adult cardiovascular anaesthesia, intensive care and mechanical circulatory devices at my home institution, a 2021-2022 fellowship in adult cardiothoracic critical care and echocardiography at St George's NHS Trust in London, and a 2022 fellowship in cardiothoracic anaesthesia at the same UK centre. These experiences gave me a solid multinational network and familiarity with different healthcare systems, as well as hands-on expertise with ECMO, ventricular assist devices, and advanced echocardiography.

My teaching record spans more than nine years and includes supervising ward practices, lecturing in anaesthesia and intensive therapy for both national and international students, and serving as faculty on national and international basic and advanced intensive-care echocardiography courses. I have authored more than 20 peer-reviewed scientific articles achieving an overall Hirsch index of 11. As a recognition of my educational work in my Institution I have received the Zoltán Szabó Mentor Award in 2024. If selected as a Hungarian Representative for ESICM, I aim to introduce (in close association with the Hungarian Intensive Care Society) the GenIUS and ICF pathways to the Hungarian Intensive Care community, actively encourage more Hungarian specialists to sign up for the EDEC diploma, and facilitate the integration of ESCIM lead teaching opportunities.

In summary, my combination of high-level clinical expertise, extensive multinational training, proven leadership in education, and a strong research portfolio equips me uniquely to serve as a Hungarian Representative for ESICM, where I will contribute strategic vision, foster collaborative projects in intensive-care practice and intensive care ultrasound.

Financial interests

Description

I have no financial interest to declare.

Source

Academic interests

Description

I am currently involved with research on intensive care fluid management and intensive care ultrasound.

Declare no conflict of interest
