28th of October – Munich ESICM Lives 2025

Notes ESICM meeting APM setting

Consensus organizational Models and integrated Care pathways → ESICM approval --> process of starting

POP-OUT study – ESICM endorsed – IRB approval – final step for activation is now with Aarne.

Several surveys are ongoing – please be aware that with the post induction hypotenstion validation study the initial link was not correctly distributed by ESICM – the correct link is now posted.

Academia / AMP modules are except for 3 all up to date. Wait for Academia section how they want to move forward.

Masterclass – on hold – however there is interest to re-activate in some way. Alexander will contact Melanie

Suggestions for consensus papers/guidelines on several topics such as AI in APM, management of post abdominal surgical complications etc.

Research coordinator position available; please send me an email when you have interest.

Chair elect will be selected around April/May next year.

Future meetings: we strive to have an online meeting and a live meeting in ISICEM for the APM section. In this way we will be better to stay in contact and have the section moving forward.
